

## CBS ArcSafe Introduces RSA-135A Remote Switch Actuator for QA/CBC Pringle Switches

**Denton, TX, June 30, 2015** – [CBS ArcSafe®](http://CBSArcSafe.com), a leading manufacturer of remote racking and switching solutions for low- and medium-voltage switchgear, introduces its remote switch actuator for QA/CBC Pringle Switches. The new CBS ArcSafe® RSA-135A actuator allows technicians to remotely close, and open/trip the Pringle switch from a safe distance while remaining stationed outside the arc-flash boundary.

Installation and operation of the RSA-135A is quick, simple, and does not require any modifications to the electrical equipment. The RSA-135A is compatible with all type QA/CBC Pringle switches with ratings of 2500A and up and equipped with shunt trip. Typical uses of these switches include heavy-duty applications such as rectifier disconnects, crane and electrified rail isolation, battery disconnects, and UPS systems. The CBS ArcSafe RSA-135A is a safer and more cost-effective solution when compared to other arc-flash mitigation alternatives.

All CBS ArcSafe products are manufactured in the U.S. at our manufacturing facility in Denton, Texas. For more information, visit [CBSArcSafe.com](http://CBSArcSafe.com) or call 877-4-SAFETY.

### About CBS ArcSafe®

CBS ArcSafe offers the electrical industry's largest inventory of remote racking and switching solutions for low- and medium-voltage switchgear that do not require modification to existing equipment for operation. All our equipment is manufactured in the U.S. at our Denton, Texas, manufacturing facility. CBS ArcSafe offers 24/7/365 emergency support and is happy to develop custom remote racking and switching solutions for customers.
