CBS ArcSafe® Introduces RSS-3 AMH For General Electric Type AMH

Denton, Texas, January 26, 2016 – [CBS ArcSafe®](http://CBSArcSafe.com), a leading manufacturer of remote racking and switching solutions for low- and medium-voltage switchgear, introduces its single-application remote racking system (RSS-3) for General Electric (GE) Type AMH circuit breaker. The lightweight, portable CBS ArcSafe RSS-3 AMH allows technicians to remotely install and remove the circuit breaker from a safe distance of up to 300 feet while remaining stationed outside the arc-flash boundary.

Installation and operation do not require any modifications to the existing electrical equipment thanks to CBS ArcSafe's magnetic latching system. The RSS-3 AMH is compatible with Type AMH circuit breakers with ratings of 1200-2000 A, including AMH-4.76-100/250/350-OD-1D. The RSS-3 AMH consists of three parts, the racking operator, the foot pedal operator, and an interlock defeat tool. Typical applications of the GE AMH circuit breaker include commercial, industrial, and service entrance applications to protect and switch mains, feeders, and incoming lines. The RSS-3 AMH is a cost-effective solution for keeping operators safe when compared to other arc-flash mitigation alternatives.

Optional features include 25-foot extension cables, 24 V DC LED light, wireless video camera system with LCD monitor, and rugged protective case assembly. All RSS-3 units are portable, fast and easy to set up, offer mechanical and/or electrical safety protection, are adjustable to fit unique electrical equipment configurations, reduce the requirements for personal protection equipment (PPE), and help customers with NFPA 70E arc-flash safety compliance.

All CBS ArcSafe products are manufactured in the U.S. at our manufacturing facility in Denton, Texas. For more information, visit CBSArcSafe.com or call 877-4-SAFETY.

About CBS ArcSafe®

CBS ArcSafe offers the electrical industry's largest inventory of remote racking and switching solutions for low- and medium-voltage switchgear that do not require modification to existing equipment for operation and allow technicians to operate equipment from a safe distance of up to 300 feet. All our equipment is manufactured in the U.S. at our Denton, Texas, manufacturing facility. CBS ArcSafe offers 24/7/365 emergency support and is happy to develop custom remote racking and switching solutions for customers. Learn more at CBSArcSafe.com, or call toll-free at 877-4-SAFETY.
